

## POP-UP LAPTOP KEYBOARD

## ABSTRACT

5       An ergonomic laptop computer or other apparatus is disclosed that provides a user  
a with a more comfortable angle for the user's wrists and hands while using the  
apparatus. The apparatus includes a keyboard housing having a top surface comprising a  
plurality of keys, a bottom surface operationally connected to a main computer body and  
positioning supports connected to the keyboard housing that extend and adjust to allow  
the keyboard to change its slope relative to the main computer body. The apparatus may  
10   be standard on laptop computers or sold as a retrofit kit that replaces existing non-  
ergonomic laptop keyboards.
